

# The Bovi Hoof Care Concept

To make it simple, its all about cero tolerance.  
Cleaning before treatment, make it possible for better healing and early detection.  
Let the cow do the healing, to make that process possible we have to make a clean environment.  
Our 3 categories of products will help you or your customers accomplish these goals

## **Bovi Trim**

Products developed for the user in every situation

## **Bovi Care**

Products for all hoof care stages – Prevention, Treatment & After Action

## **Bovi Wash**

Simple the best way to manage & prevent your hoof problems

BECAUSE MORE KNOWLEDGE BRINGS MORE VALUE

## **The Hoof Care Box – Immediate hoof care with minimum time consumption**

### **Immediate hoof care**

The Hoof Care Box is used to handle the immediate problems, which occurs between the routine trimmings, in a quick and simple way. Until now the box has been sold in more than 600 herds with a variation from 15 – 2700 cows in more than 8 different countries.

### **5 quick about the Hoof Care Box**

- The box is brought to the cow and not the other way around
- The cow do not leave its immediate environment
- You will be able to treat immediate problems yourself
- It has a simple operation

### **Take Notice:**

This is a stock item that can be packed and shipped with a few day's notice  
Packed in pallet, ready for dis patch:  
Weight: 150 kg. L: 180 - W: 110 - H: 155

- It can also be delivered as a heifer or Jersey box

### **Minimum time consumption**

It is not necessary to remove the cow from its herd and immediate environment as the cow will be fixated in the cattle fence and then the box is placed over the cow. In a very short period of time the cow will be elevated and ready for treatment.

### **Simple operation**

The box is operated by a mounted winch. The winch on the side elevates the cow and the winch on the back elevates both the fore- and back leg. To secure a safe hoof trimming the Hoof Care Box is equipped with a supporting device for the fore- and back leg. Furthermore, this supporting device can also be installed subsequently on all of our previously sold boxes.

## **Bovi Cart – Manual hoof wash for optimal hoof care and prevention of Digital Dermatitis**

### **Adapted hoof wash**

Bovi Cart is a manual hoof washer, which is developed with the purpose of making it easier to wash the hooves of animals that are fixated in cattle fence.

Bovi Carts is furthermore also developed for the farmers who do not need a stationary hoof washer, but who will do hoof washing with the same unit in more barns.

Numerous tests show that frequent washing of the hooves has a controlling effect on inter-digital dermatitis. It is particularly important to clean in the cavity between the hooves. The highwater pressure, which Bovi Carts is equipped with, gives an efficient but gentle cleaning.

### **Take Notice:**

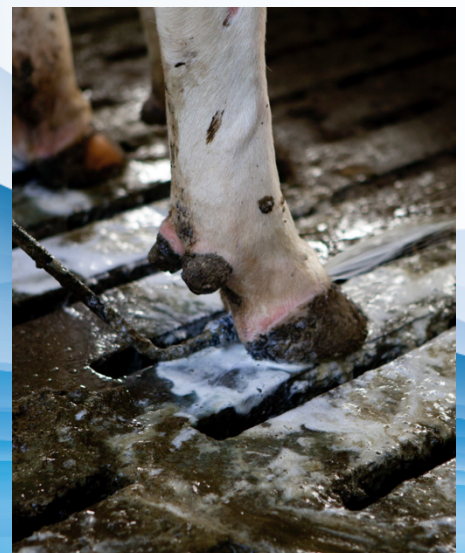

This is a stock item that can be packed and shipped with a few day's notice

### **With and without chemicals**

Bovi Cart is equipment with a 60 litres container, where you can mix water with soap, chemicals or disinfection. As the tank holds enough water for 50-100 treatments, the water consumption is low. The Bovi Cart is delivered fully equipped with a spray lance and a reel, which holds 5 m hose. As an option the reel can also be equipped with up to 20 m hose. This, together with the battery, ensures a good working range, even in large stables. In this way you will be able to fixate a line of animals and wash their hooves while walking behind them. Different lances are available, e.g. for working in milking parlors.

### **Technical specification**

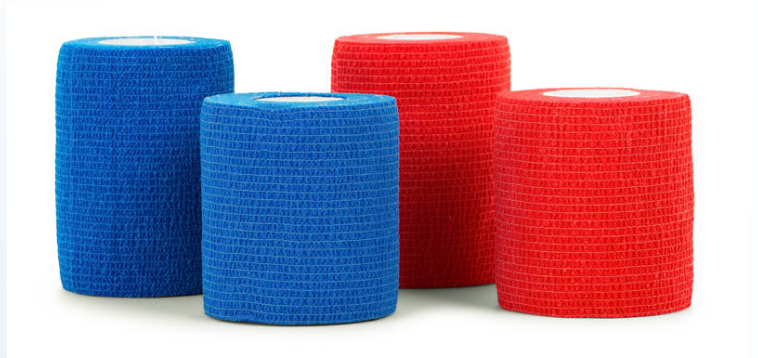

- Stepless working pressure of 5 bar
- 60-litre tank capacity
- Standard hose length: 5 meters (up to 20 meters as an option)
- Industrial battery
- Pistol with a long lance for washing in cattle fence
- Pistol for washing in milking parlors & at the hoof-trimming box

## Bovi Hoof Care Bandage:

This dressing has been developed together with Danish professional hoof trimmers and farmers. Produced in absolute best quality, to ensure long treatment time. This dressing is low stretch, to ensure that you do not over tighten the bandage.

- Low Stretch
- 2-3 bandage / roll
- More Value
- Easy to tear
